

XSRE Lock Captive Bar

Everyone's favourite accessory carabiner – the XSRE – is now available with the option of a locking screwgate and captive bar for extra security. The removable threaded captive bar helps ensure the correct orientation with lanyards and holds components securely.

XSRE LOCK CAPTIVE BAR V02

Made with the same attention to detail as all our standard size DMM carabiners, the XSRE Lock CB is a perfectly formed, high performance accessory clip. It has a functional industrial pedigree, yet crosses over easily into everyday life situations. Widely adopted for non-PPE use on working at height sites, the XSRE is just as useful on a tree care harness to organise gear as it is for clipping keys onto a belt loop.

Available in a choice of eye-catching nine colours.

FEATURES

- Offset-D shape
- Removeable threaded captive bar
- Anti-vibration screwgate version for added security
- Hot forged construction for high strength-to-weight ratio
