

Tent Assembly Instructions

1.

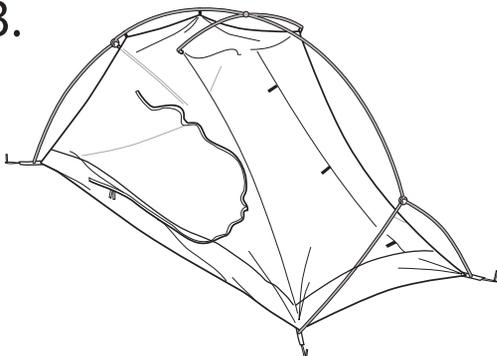

Lay footprint on an even ground and stake all four corners. This step is optional but highly recommended.

2.

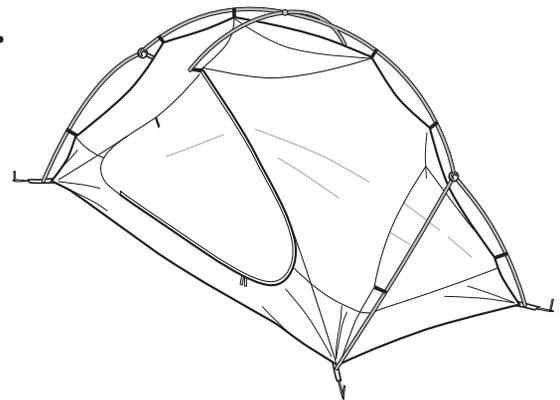

Lay the tent body on an even ground or footprint and stake the four corners of the tent body. Set the poles making sure all pole sections are aligned with the corresponding grommets.

3.

Insert pole-tips into the grommets for both sides. Once fastened, insert the ridge pole-tips found in the middle of the tent.

4.

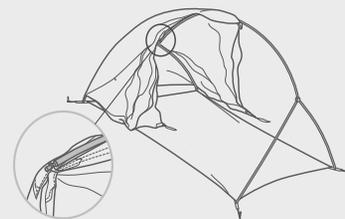

Attach all the clips along the poles.

5.

Spread the rainfly over the tent. Buckle down the corners, and tightly fasten each corner when buckled. Stretch the vestibule until it is fully taut and stake it down (do this for the other side as well).

For a quick & ultra-light setup

For a quick and ultra light setup, skip steps 2-4. Attach tent poles onto the grommets of the footprint and spread rainfly over the tent. Stretch the vestibule until it is fully taut and stake down (see Step 5).
