

# TENSOR™ EXTREME CONDITIONS

## ULTRALIGHT INSULATED SLEEPING PAD

### HIGHEST WARMTH-TO-WEIGHT RATIO ON THE MARKET

Tensor™ Extreme Conditions represents a new chapter in NEMO backcountry pad innovation. With its Apex™ baffle internal structure, Tensor EC toasts the competition, achieving an 8.5 R-value and a mind-bending warmth-to-weight ratio. Now the warmest, most insulating ultralight pad on the market, it's also still the quietest pad in its class. (Dreamy, right?)

#### ALL-NEW BAFFLE CONSTRUCTION

Using distinctly shaped baffles, the Apex™ design evenly suspends a record four layers of insulating Thermal Mirror™ film inside the pad. The strategic placement and number of layers combine to produce incredible warmth at as little as one pound.

#### bluesign® APPROVED PREMIUM NYLON FABRICS

Tensor Extreme Conditions ushers in improved puncture-resistance and strength with a 40D nylon bottom to protect the pad from tougher terrain. Meanwhile, the premium 20D nylon top offers a soft, lightweight sleep surface.

Tensor™ Extreme Conditions

# 8.5 R-VALUE

#### Min Weight Range

17 oz–1 lb 7 oz (472 g–662 g)

#### Packed Size Range

10.0 x 4.0–10.5 x 4.5 in diam

#### MSRP

\$249.95–\$279.95

Lighter. Warmer. Stronger. Always Unbelievably Quiet.
