METEORA

When climbing, mountaineering, or ski touring, the METEORA helmet is the right choice! With a headband adapted to be worn with a ponytail, it offers efficient protection for these three sports. Its lightweight, compact design and excellent ventilation make for a comfortable helmet in any season. The design provides greater coverage and enhanced head protection. Specifically designed to be worn with ski goggles, it is CE certified for ski touring and is adapted to be worn during this activity (please note that this helmet does not meet the requirements of the EN 1077 standard for alpine skiing helmets).

Specific sizing (52/58 cm) and OMEGA headband with pronounced notch for wearing the helmet with a ponytail.

The design provides greater coverage and is lower at the back of the head for enhanced protection against lateral, frontal, and rear impact.

The low-profile design of the helmet is achieved using In-Mold construction with an expanded polystyrene (EPS) foam liner injected inside a lightweight polycarbonate shell.

Rear elastic band is compatible with ski goggle headbands.

Short Description Lightweight helmet designed for women, with enhanced protection for climbing, mountaineering, and ski touring

- Selling Points**
- Lightweight and comfortable design for women:
 - specifically sized for women (52/58 cm)
