

WeatherTech® MirrorFone®

Installation Instructions

MirrorFone works best on flat, smooth surfaces like mirror or glass. Ensure the surface you are mounting it on is dry.

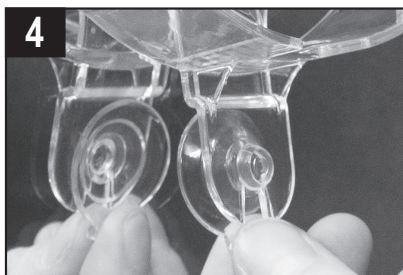

Adhere MirrorFone to the surface by gently pushing on each of the three suction cups, squeezing out the air, until each feels secure.

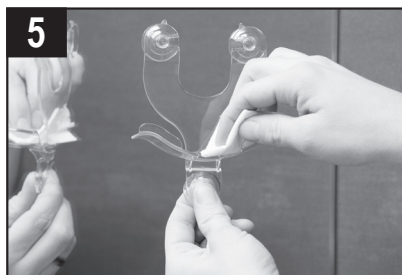

Place mobile device on cradle.

Phone can be placed horizontally and vertically, with or without charging cable.

To remove MirrorFone, safely store your mobile device before gently pulling the tabs on each of the suction cups.

To clean MirrorFone, simply wipe with a soft damp cloth and/or mild detergent.
